

Super Clean™ Gas Filters

new

'Talking' Filters!

with Electronic Indicator

EP-B-0606960 U.S. Patent 5,478,378

Patent Pending: PCT/NL2012/050477

Fast Stabilization
Helium Filled
GC/MS Triple
Filter

Traditional Indicators
Uses sensitive color
changing indicators to
identify leaks or other
system failures which
can cause pre-mature
saturation

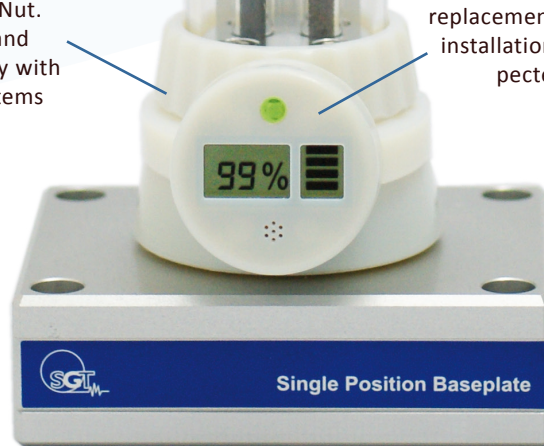

Compatibility
New **Universal** Ring Nut.
Easier Installation and
improved compatibility with
other base plate systems

Electronic Indicator
Progressively displays real-time
filter status instead of a 'last
minute' color change from tra-
ditional indicators, allowing you
to determine a more controlled
replacement schedule for your
installation to prevent unex-
pected downtime

New Universal Ring Nut

- Serves as a **mounting point** for the Electronic Indicator device
- Easier attachment of genuine SGT purifiers to **competing** base plate systems.
- Can be used to **retrofit** (competing) filters with an electronic indicator
- **Backwards** compatible

www.virtualindicator.com/preorder

Electronic Indicator

- Audio-visual **early warning** system
- Enjoy **additional replacement filter discounts** when filter is replaced according schedule
- Can be **linked** to our virtual indicator platform or can be **manually** configured according your replacement schedule preferences.
